Committee held in London on 11—13 September, 1985, it was agreed that in view of the recent liberalisation of Government of India's policies relating to import of technology and investment from abroad, efforts should be increased to bring the scope for mutually beneficial Collaboration to the attention of a wider range of British Companies and active steps should be taken by the respective national agencies to establish and enhance direct contacts between complementary Indian and British Companies. Potential areas of such contacts could include automotive products; telecommunications; electronics and software flexible manufacturing systems; anti-pollution measures; energy conservation and alternative energy sources etc. It was also agreed that special priority should be devoted to joint industrial ventures with a view to enhancing exports from India and developing links for collaboration in projects in third countries.
